Peer review statement

We are the editorial board of the **2nd International Scientific Conference of Water- 2023 (ISCW-2023)** declared that all papers published in this volume of *IOP Conference Series: Earth and Environmental Science* have been peer reviewed through processes administered by the Editors. Reviews were conducted by expert referees to the professional and scientific standards expected of a proceedings journal published by IOP Publishing, and accepted based on the reviewers' comments in the double-blind peer review process. Each referee's report was judged by at least one editor, to give the final decision.

PREFACE: 2nd International Scientific Conference of Water- 2023 (ISCW-2023)

The **ISCW-2023** conference intends to bring together junior and senior, international and national researchers, scientists and scholars interesting in the field of water harvesting and desertification combat. We think the conference will offer an excellent opportunity for networking with other members and exchange knowledge and explore the most recent developments in the sustainable development of water resources and ecosystems, management of water resources in arid and semi-arid regions, modern techniques for water harvesting and conserving in dry regions, in addition to water quality and biodiversity.

ISCW-2023 is a prestigious event organized by the Center of Upper Euphrates Basin Development, University of Anbar, with a motivation to provide an excellent international platform for academicians, researchers, engineers, industrial participants and budding students around the world to share their research results with the global experts. We cordially invited participants from all over the world who wish to share their best practices and research findings in **ISCW-2023** and enlighten their new ideas to make this event growing from strength to strength.

Participants will be offered the opportunity to contribute to the conference in various roles: they can discuss keynotes, produce a poster presentation and

submit full research or review articles. Articles submitted to the conference should report original high-quality and previously unpublished results. Submission of a manuscript implies that it is not under consideration for publication elsewhere. All submitted articles will be subjected to a double-blind peer-review process. Novelty, relevancy, language standards, references, and many other factors are considered for the evaluation process. The conference nominated Prof. Nadhir Al-Ansari (Environmental and Natural Resources Engineering, Lulea University of Technology, Arab Open Academy in Denmark), Prof. Dr. Cj (Coen) (Ristsema Chairholder Soil Physics and Land Management, Washington University & Research), and Dr. Mohamed Ouessar (Applied Biological Sciences, Laboratory of Eremology and Combating Desertification, Arid Zone Research Institute) as keynote speakers.

ISCW-2023 will be held basically via physical attendance (In-person) for two days 15th - 16th March 2023 in Ramadi, Anbar, Iraq. Each participant will be given approximately 10 minutes to view the most important findings of his/her research, and 5 minutes to discuss these results.

Sincerely yours,

Prof. Dr. Ayoob Obaid Alfalahi
