I Introduction	1
----------------------	---

Part I Nature and Types of Hydrothermal Solutions and Systems

1 Water and Solutions	5
1.1 Introduction	5
1.2 Water: Its Origin and Significance	5
1.2.1 Planetary Evolution and the Origin of Water	6
1.2.2 Water – Past and Present	8
1.2.3 Water in Subduction Zones	12
1.2.4 Water in the Crust	13
1.3 Solutions	14
1.4 Solubility and Boiling	15
1.5 Acid-Base Nomenclature	16
1.6 Structure of Water – Hydrolysis and Hydration	17
1.7 Redox Potential (Eh)	18
1.8 Chemical Potential, Chemical Activity and Fugacity	20
References	21
2 Hydrothermal Solutions	23
2.1 Introduction	23
2.2 Water of Hydrothermal Solutions	23
2.3 Oxygen and Hydrogen Isotope Systematics of Hydrothermal Fluids	25
2.4 Fluid Inclusions	28
2.5 Dissolved Constituents and Metals Partitioning into Hydrothermal Solutions	31
2.5.1 Partitioning of Metallic Elements into Hydrothermal Solutions	33
2.6 Metal Transport	33
2.6.1 Complex Ions and Ligands	34
2.6.2 Complex Ions in Hydrothermal Solutions	37
2.7 Metal Deposition	39
References	40

XII	Contents
3 Hydrothermal Systems	42
3.1 Introduction	42
3.2 Definition and Types	43
3.3 Magmatic Hydrothermal Systems Related to Shallow and Deep-Seated Plutonism	44
3.4 Magmatic-Meteoric Hydrothermal Systems, Related to Volcano-Plutonic and Volcanic Complexes	45
3.4.1 Magmatic Hydrothermal Systems	46
3.4.2 Predominantly Meteoric Hydrothermal (Geothermal) Systems	50
3.4.3 Hot Water-Dominated and Vapour-Dominated Hydrothermal Systems	56
3.4.4 Hot Springs, Mud Pools, Geysers, Crater Lakes and Fumaroles	57
3.5 Sub-Sea-Floor Hydrothermal Systems: Spreading Centres and Island Arcs	59
3.5.1 Hydrothermal Systems in Spreading Centres	60
3.5.2 Hydrothermal Systems in Submarine Volcanic Centres	66
3.6 Rift-Associated Hydrothermal Systems in Sedimentary Basins	69
3.6.1 Hydrothermal Systems	71
3.6.2 Hydrothermal Systems in Modern Rift Settings	79
3.7 Hydrothermal Systems of Metamorphic and Crustal Origin	83
3.7.1 Metamorphism, Metasomatism, Dewatering of Rock Sequences and Fluid Generation	84
3.7.2 Fluid Pressure, Metamorphic Porosity, Impermeable Barriers and Hydraulic Fracturing	86
3.7.3 Metamorphic Hydrothermal Systems	88
3.7.4 Fluid Paths: Faults, Shear Zones and Thrust Faults	91
3.7.5 Fluids in Subduction Zones	96
References	97
4 Hydrothermal Alteration	101
4.1 Introduction	101
4.2 Hydrogen Ion Metasomatism and Base Exchange	102
4.2.1 Chemical Processes Related to Hydrogen Ion Metasomatism	103
4.3 Styles and Types of Hydrothermal Alteration	109
4.3.1 Styles of Alteration	110
4.3.2 Types of Alteration	110
4.3.3 Other Types of Alteration	123
4.4 Quantification and Monitoring of Hydrothermal Alteration Processes – Data Presentation	132
4.4.1 Rare Earths Elements in Hydrothermal Alteration Processes	136
4.5 Oxygen and Hydrogen Isotope Systematics	139
4.6 Metamorphism of Hydrothermally Altered Rocks	142

4.7	Detection of Hydrothermal Alteration by Spectral Remote Sensing	150
References		152

***Part II Crustal Evolution, Global Tectonics,
Hydrothermal Mineral Deposits and Mineral Exploration –
Geotectonic and Metallogenic Analysis of Orogenic Belts***

5	Crustal Evolution, Global Tectonics and Mineral Deposits ..	159
5.1	Introduction	159
5.2	Tectonic Phases in the Earth's Geological Evolution and Related Metallogeny	162
5.2.1	The Archean Eon: Phase of Microplate Tectonics	162
5.2.2	The Proterozoic Eon: Phase of Intraplate Tectonics	171
5.2.3	The Phanerozoic Eon: Phase of Macroplate Tectonics, Sea Floor Spreading and Continental Drift	179
5.2.4	Conclusions	189
References		190
6	Geological Processes and Hydrothermal Mineralisation in Plate Tectonic Settings – Mineral Exploration ..	197
6.1	Introduction	197
6.2	Extensional Plate Tectonics	198
6.2.1	Mid-Ocean Spreading Centres	199
6.2.2	Intracontinental Rifts	201
6.2.3	Passive Continental Margins and Interior Basins	205
6.3	Compressional Plate Tectonics	206
6.3.1	Subduction-Related Settings	207
6.3.2	Collision-Related Settings	212
6.4	Transform Fault Tectonics	215
References		216
7	Geotectonic and Metallogenic Analysis of Orogenic Belts ..	219
7.1	Introduction	219
7.2	The Pan-African Orogenic Belts of Africa	219
7.2.1	The Arabian-Nubian Shield	221
7.2.2	The Damara Orogen, Namibia	226
7.2.3	The Lufilian Fold Belt	233
7.3	Metallogenic Epochs and Geotectonic Environments of Hydrothermal Mineral Deposits of the Orogenic Belts in New Zealand	236
7.3.1	Geotectonic Settings of the Tuhan Orogeny and Related Hydrothermal Mineralisation	236

7.3.2	Geotectonic Settings of the Rangitata Orogeny and Related Hydrothermal Mineralisation	239
7.3.3	Geotectonic Settings of the Kaikoura Orogeny and Related Hydrothermal Mineralisation	241
	References	241

***Part III Hydrothermal Processes and Activities –
Related Mineral Deposits***

8	Alkali Metasomatism and Related Mineral Deposits	247
8.1	Introduction	247
8.2	Alkali Metasomatism in Continental Igneous Systems	247
8.2.1	Role of Volatiles in Granitic Magmas	247
8.2.2	Textural Features	251
8.2.3	Sodic Metasomatism and Albibites	253
8.2.4	Potassic Metasomatism and Microclinites	255
8.3	Alkali Metasomatism in Anorogenic Ring-Type Complexes	256
8.3.1	Fenites	259
8.4	Mineralisation Related to Alkali Metasomatism	265
8.4.1	Mineralisation in Ring Complexes of the Ijolite-Carbonatite Association	266
8.4.2	Mineralisation in Ring Complexes of the Alkaline Granite Association	271
8.4.3	Mineralisation Related to Alkali Metasomatism of Pegmatites	274
	References	277
9	Greisen Systems	280
9.1	Introduction	280
9.2	Greisenisation Processes	282
9.3	Geochemistry	289
9.4	Greisen-Related Mineral Deposits	290
9.4.1	Sn and W Geochemistry in the Greisen Environment – Deposition of Cassiterite and Wolframite	291
9.4.2	Sn Deposits Associated with the Acid Phase of the Bushveld Igneous Complex, South Africa	294
9.4.3	Sn-W Mineralisation at Brandberg West, Damara Orogen, Namibia	304
9.4.4	Endo- and Exogreisen Sn Mineralisation at Mount Bischoff, Tasmania	310
9.4.5	The Hercynian Sn-W Deposits of Southwest England, Cornwall and Portugal	314
	References	322

10	Porphyry Systems and Skarns	325
10.1	Introduction	325
10.2	Tectonic Settings	326
10.3	Classification of Porphyry Systems	328
10.4	Hydrothermal Alteration and Mineralisation	330
10.4.1	Lowell-Guilbert Model	333
10.4.2	Diorite Model	335
10.4.3	Alteration-Mineralisation of Carbonate Wall Rocks (Skarns)	336
10.5	Mineral Deposits of Porphyry Systems	344
10.5.1	Panguna and Ok Tedi Porphyry Cu-Au Deposits	344
10.5.2	Porphyry Cu-Mo Deposits in Chile	349
10.5.3	Porphyry Mo Deposits of the Colorado Mineral Belt	355
10.5.4	Porphyry Mo Mineralisation in the Oslo Graben, Norway	360
10.5.5	Skarn Deposits in the Western USA	361
10.5.6	Other Types of Skarn Deposits	364
10.5.7	Porphyry Sn Deposits in Bolivia	367
	References	370
11	Fossil and Active Geothermal Systems – Epithermal Base and Precious Metal Mineralisation (Including Kuroko-Type Deposits)	375
11.1	Introduction	375
11.2	General Characteristics of Epithermal Systems	378
11.2.1	Main Types of Epithermal Deposits	380
11.3	Volcanic-Hosted Epithermal Deposit Types	385
11.3.1	Epithermal Systems of Submerged Volcanic Structures	387
11.3.2	Hydrothermal Alteration	390
11.3.3	Mineral and Metal Zoning	394
11.4	Transport and Deposition of Precious Metals in Epithermal Systems	396
11.4.1	Boiling Depths and Metal Zoning	400
11.5	Active Geothermal Fields	401
11.5.1	Geothermal Systems of the Taupo Volcanic Zone, New Zealand	402
11.5.2	Salton Sea, California, USA	405
11.6	Volcanic-Hosted Epithermal Mineral Deposits	407
11.6.1	Hauraki Goldfields, Coromandel Peninsula, New Zealand	407
11.6.2	Epithermal Au in Lihir Island, Papua New Guinea	415
11.7	Sediment-Hosted Epithermal Deposits	418
11.7.1	Mineral Belts and Deposit Types of Nevada, USA	420
11.7.2	Nature of Fluids and Ore Genesis	426
11.8	Kuroko-Type Mineral Deposits	427
11.8.1	Kuroko Deposits	428
11.8.2	Precambrian Volcanogenic Massive Sulphide Deposits	440
	References	443

12	Hydrothermal Processes in Oceanic Crust and Related Mineral Deposits	450
12.1	Introduction	450
12.2	Physiography of the Ocean Floor	451
12.2.1	Mid-Ocean Ridges	452
12.2.2	Transform Faults and Fracture Zones	453
12.2.3	Seamounts and Volcanic Chains	454
12.3	Birth, Life and Death of an Ocean Basin	454
12.4	Oceanic Lithosphere and Ophiolites	457
12.5	Heat Flow, Oceanic Crust Metamorphism and the Nature of Related Hydrothermal Solutions	460
12.5.1	Heat Flow and Oceanic Crust Metamorphism	461
12.5.2	Nature and Composition of the Hydrothermal Solutions	465
12.6	Tectonic Settings, Sub-Sea-Floor Hydrothermal Processes, Hot Springs and Their Mineral Deposits	468
12.6.1	Tectonic Settings	470
12.6.2	Hydrothermal Processes and Types of Sulphide Deposits	473
12.6.3	Sub-Sea-Floor Hydrothermal Mineral Deposits	476
12.7	Oceanic Crust-Related Hydrothermal Mineral Deposits	488
12.7.1	Massive Sulphide Deposits of the Samail Ophiolite, Oman	488
12.7.2	The Cu Deposits of Cyprus Island	491
12.7.3	The Cu Deposits of the Matchless Amphibolite Belt, Namibia	494
