

Northwest European Micropalaeontology and Palynology

Editors:

DAVID J. BATTEN

Reader, Department of Geology and Petroleum
Geology, University of Aberdeen

and

MICHAEL C. KEEN

Lecturer, Department of Geology, University of
Glasgow

ELLIS HORWOOD LIMITED
Publishers • Chichester

Table of contents

Preface	<i>Page</i>
D. J. Batten	ix
 Chapter 1 Jurassic and Upper Triassic biostratigraphy of the North Celtic Sea and Fastnet Basins	
N. R. Ainsworth, M. O'Neill and M. M. Rutherford	1
 Chapter 2 Micropalaeontological and stratigraphical recognition of the Triassic–Jurassic boundary in the North Celtic Sea and Fastnet Basins	
M. M. Rutherford and N. R. Ainsworth	45
 Chapter 3 Spore and pollen assemblage zonation of Swedish Bajocian and Bathonian sediments	
Dorothy Guy-Ohlson	70
 Chapter 4 Palaeoenvironments of the late Bathonian–mid-Callovian in the Inner Moray Firth	
A. M. MacLennan and N. H. Trewin	92
 Chapter 5 Visual and chemical kerogen analyses of the Lower Kimmeridge Clay, Westbury, England	
Henrik Nøhr-Hansen	118
 Chapter 6 Late Jurassic palynofacies trends, Piper and Kimmeridge Clay Formations, UK onshore and northern North Sea	
R. V. Tyson	135

	<i>Page</i>
Chapter 7 Palaeoenvironmental interpretation and distribution of the lower Kimmeridgian foraminifera from the Helmsdale–Brora Outlier, northeast Scotland Francis John Gregory	173
Chapter 8 Dinoflagellate cyst biostratigraphy and palaeoenvironments of the Upper Jurassic (Kimmeridgian to basal Portlandian) of the Helmsdale region, east Sutherland, Scotland Hugh F. Barron	193
Chapter 9 A review of late Jurassic to earliest Cretaceous radiolaria and their biostratigraphic potential to petroleum exploration in the North Sea R. Dyer and P. Copestake	214
Chapter 10 Upper Cretaceous microbiostratigraphy of Bornholm, Denmark S. Packer, M. B. Hart, B. A. Tocher and S. Braley	236
Chapter 11 Oligocene ostracod biofacies from onshore areas of the North Sea Basin M. C. Keen.	248
Chapter 12 Palynomorph and palynodebris distributions in modern British and Irish estuarine sediments Katherine M. Farr	265
