Foreword	9
Preface	11
Introduction	15

DIVERGENT PLATE BOUNDARIES

1 Geodetical and geophysical investigations on Iceland and surrounding seas	19
Introduction (G. Angenheister, D. Möller)	19
Geodetic determination of horizontal movements of the Earth's crust (D. Möller)	20
Measurements of local fissure movements in NE-Iceland (H. Pelzer)	22
Tilt measurements in a fissure of the Kelduverfi region (C. Gerstenecker)	24
Levelling (H. Spickernagel)	24
Gravity variations with time in northern Iceland (W. Torge)	26
Interpretation of the anomalies of the Earth's magnetic field in northern Iceland (H. Becker, N. Petersen)	28
Magnetotelluric investigations on Iceland (M. Beblo)	30
Refraction seismic investigations in Iceland (H. Gebrande)	31
Refraction seismic investigations around Iceland (W. Weigel)	35
Geothermal investigations on Iceland and the surrounding parts of the mid-atlantic ridge system (K. Bram)	37
Magnetic and gravity measurements at sea (D. Voppel)	40
Geophysical reconnaissance surveys in the Norwegian Sea (K. Hinz)	42
In situ rock stress in Iceland (K. Schäfer)	42
Evolution of the lithosphere at Reykjanes ridge from Rayleigh wave dispersion (N. Girardin, W. Jacoby)	44
2 The Red Sea (H. Bächer, K. Bram, S. Plaumann, H. A. Roeser)	45

CONVERGENT PLATE BOUNDARIES

3 Geodynamic evolution of the Eastern Alps along a geotraverse (H. Kreuzer, G. Morteani, D. Roeder)	51
---	----

4	An 850 km long lithospheric seismic profile (ALP 75); implications for the crustal structure in the Eastern and Southern Alps (H. Miller)	65
5	Geodynamic evolution of the Apennines and Hellenides (P. Giese, K. Görler, V. Jacobshagen, K.-J. Reutter)	71
6	Geophysical studies and interpretation for the Aegean area (J. Makris)	88
7	Messinian evaporitic facies in the Mediterranean area: geodynamic implications (F. H. Fabricius)	91
8	Orogeny and mineralization in the Iranian fold belts (G. Lensch, M. H. Nabavi)	97
9	German contributions to geodynamic research in Latin-America 1972—1978 (W. Zeil)	101
10	Geochemical and tectonic investigations in the Tananao schist of the Central Range, Taiwan (K. Schmidt, K. Weber-Diefenbach)	117

ACTIVE CONTINENTAL MARGINS

11	Active ocean margins in SE-Asia (H. Beiersdorf, K. Hinz)	121
----	--	-----

PASSIVE CONTINENTAL MARGINS

12	Passive continental margins: NW-Africa, North Atlantic, NW-Australia (K. Hinz, E. Seibold)	127
----	--	-----

INTRAPLATE TECTONICS

13	Plateau uplift of the Rhenish shield (J. H. Illies)	139
14	Geodetic contributions to geodynamic processes in Western Germany (H. Mälzer, G. Schmitt)	142
15	A critical study of subsidence and shoulder uplift of the Upper Rhine Graben by a volume balance in time and space (A. Roll)	149
16	Deep crustal reflections and the structure of the Earth's crust (G. Dohr) . .	155
17	Form and formation of graben structures: the Maltese Islands (J. H. Illies) .	161

PREMESOZOIC OROGENIC EVENTS

18	The geosynclinal development of the Variscides with special regard to the Rhenohercynian zone (O. H. Walliser)	185
19	The structural and metamorphic development of the Variscides with special regard to the Rhenohercynian and Saxothuringian zones (H. J. Behr, K. Weber)	196
20	A coalification section along a geotraverse west of the Rhine between Schleiden and Aachen (M. Teichmüller, R. Teichmüller)	204

21	Geodynamic aspects of the intracratonic branch of the Damara mobile belt in Namibia (H. Martin)	207
22	Chronologic evolution of the Panafrican Damara belt in Namibia, south-western Africa (A. Kröner)	221
23	New aspects of craton-mobile belt relationships in the Archean and early Proterozoic: examples from southern Africa and Finland (A. Kröner)	225
24	The granulite complex of Finnish Lapland and adjacent rock series (S. Seifert)	235

GENERAL ASPECTS OF GEODYNAMICS

25	The ocean crust (H.-U. Schmincke)	237
26	The subcrustal lithosphere — mechanical properties, differentiation and dynamical processes (K. Fuchs)	241
27	High pressure research relevant to geodynamics (W. Schreyer)	254
28	Activities of the special collaborative programme (Sonderforschungsbereich) 78 "Satellitengeodäsie" relevant to geodynamics (Ch. Reigber, M. Schneider, P. Wilson)	266
	List of editors and contributors	273
