
CONTENTS

Preface

Chapter 1

THE PROBLEM OF THE DIVERSITY OF IGNEOUS ROCKS by G. Malcolm Brown 3

Chapter 2

SILICATE LIQUID IMMISCIBILITY IN MAGMAS by Edwin Roedder 15

General Behavior of Systems Involving Immiscibility 16

Theoretical Basis of Immiscibility 20

Natural Occurrence of Immiscibility 22

Evidence Suggestive of Immiscibility 34

Other Types of Immiscibility in Magmas 45

Conclusions—Petrological Significance of Silicate Immiscibility 47

Chapter 3

FRACTIONAL CRYSTALLIZATION AND PARTIAL FUSION by D. C. Presnall 59

Fractional Crystallization 61

Partial Fusion 66

Discussion 72

Chapter 4

CRYSTALLIZATION IN SILICATE SYSTEMS by Arnulf Muan 77

Binary Systems 78

Ternary Systems 91

Quaternary Systems 114

Systems Containing More than Four Components 125

Concluding Remarks 129

Chapter 5

THE REACTION PRINCIPLE by E. F. Osborn 133

Reactions during Fractional Crystallization of Haplobasaltic Liquids in
Three-Component Systems 134

Reactions during Fractional Crystallization of Haplobasaltic Liquids in the
System $\text{CaO-MgO-Al}_2\text{O}_3\text{-SiO}_2$ 137

Reactions during Fractional Crystallization of Haplobasaltic Liquids in the
System CaO-MgO-FeO-SiO_2 141

Reaction Series 144

Discontinuous Precipitation of Olivine and Spinel Phases 146

Magnetite Precipitation during Fractional Crystallization of Haplobasaltic Liquids
under Conditions of Constant Total Composition 150

Reactions during Fractional Crystallization of Oxygen-Buffered, Haplobasaltic
Liquids in the System $\text{CaO-MgO-Iron Oxide-SiO}_2$ 152

viii CONTENTS

Significance of Curves Illustrating $(\text{FeO} + \text{Fe}_2\text{O}_3) / (\text{FeO} + \text{Fe}_2\text{O}_3 + \text{MgO})$ vs. SiO_2 for Volcanic Rock Suites	155
Reactions during Fractional Crystallization of Haplobasaltic Liquids at Higher Pressures	161
Conclusion	165
Chapter 6	
FRACTIONAL CRYSTALLIZATION OF BASALTIC MAGMA by Ikuo Kushiro	171
Basalt Magma Types	172
Reaction Relation of Olivine with Liquid	174
Course of Fractional Crystallization of Basaltic Magma	177
Crystallization of Pyroxene and Plagioclase	187
Formation of Biotite	189
Separation of Hornblende	192
Fractional Crystallization of Basaltic Magma at High Pressures	194
Concluding Remarks	199
Chapter 7	
THE LIQUID LINE OF DESCENT AND VARIATION DIAGRAMS by Ray E. Wilcox	205
Inferring Magma Composition from Rock Analysis	206
Variation Diagrams	207
Quantitative Graphical Testing of Rival Magmatic Processes	218
Computer Analogs of Graphical Tests	224
Chapter 8	
GLASS AND THE GLASSY ROCKS by I. S. E. Carmichael	233
Properties of Glass	234
Kinetics of Glass Formation	237
Temperatures of Silicic Glasses	240
Water in Glasses	241
A Contrast between Glass and the Crystalline Equivalent	242
Chapter 9	
ROCKS WHOSE COMPOSITION IS DETERMINED BY CRYSTAL ACCUMULATION AND SORTING by T. N. Irvine	245
Compositional Effects of Crystal Fractionation and Accumulation:	
Principles and Theory	248
Some Natural Examples of Crystal Fractionation and Accumulation:	
Observations and Interpretations	265
Effects of Crystal Sorting: A Paradox	285
Conclusions	299
Chapter 10	
EFFECTS OF ASSIMILATION by A. R. McBirney	307
Equilibrium Relations between Inclusions and Liquids	308
The Role of Trace Elements and Isotopes	315
Observed Relations in Natural Systems	315
Effects of Assimilation of Rocks of Sedimentary Origin	318
Effects of Assimilation of Igneous Rocks	322
Contamination by a Second Liquid	328
The Importance of Assimilation as a Petrogenetic Process	329

Chapter 11

THE FORMATION OF SILICEOUS POTASSIC GLASSY ROCKS by David B. Stewart 339

Chapter 12

THE FELDSPATHOIDAL ALKALINE ROCKS by J. Gittins 351

Definition and Usage 351

Experimental Studies 352

Nepheline–Feldspar Tie Lines in Natural Rocks 360

Natural Rocks and the Residua System 363

The “Peralkaline Residua System” $\text{Na}_2\text{O}-\text{Al}_2\text{O}_3-\text{Fe}_2\text{O}_3-\text{SiO}_2$ 371

Pseudoleucites 374

Melting Studies 376

Schemes of Magma Genesis 381

Chapter 13

MELILITE-BEARING ROCKS AND RELATED LAMPROPHYRES by H. S. Yoder, Jr. 391

The Diopside–Nepheline Join 394

The System $\text{Fo}-\text{Ln}-\text{Ne}-\text{Qz}$ 397

Occurrence of Monticellite in Alnoite 405

Origin of Melilite-Bearing Magmas 406

Chapter 14

THE FRACTIONAL RESORPTION OF COMPLEX MINERALS AND THE FORMATION OF STRONGLY FEMIC ALKALINE ROCKS by David R. Wones 413

Chapter 15

FURTHER EFFECTS OF FRACTIONAL RESORPTION by E. D. Jackson 423

Reversal of Normal Order of Zoning 424

Limits of Resorption 428

Local Resorptive Effects 428

Formation of Spinel in Ultrabasic Rocks 429

Origin of Picotite and Chromite 430

Chapter 16

THE IMPORTANCE OF VOLATILE CONSTITUENTS by C. Wayne Burnham 439

Silicate Melt-Volatile Solutions 443

Melting Relations in Silicate-Volatile Systems 457

Concluding Statement 478

Chapter 17

PETROGENESIS AND THE PHYSICS OF THE EARTH by P. J. Wyllie 483

Petrogenesis, 1928 484

Petrogenesis, 1978 485

Magma Sources 486

Observations Throwing Light on the Physical Condition of Earth Shells 488

Earthquakes and Earthquake-Wave Propagation 488

Temperature Distribution 491

Phase Relationships of Mantle Peridotite 497

Production of Basaltic Magma by Selective Fusion of Peridotite 506

Production of Granitic Magma by Selective Fusion of the Crust 511

x CONTENTS

Production of Magma of Intermediate Composition by Selective Fusion of Subducted Oceanic Crust	512
Concluding Remarks	514
Chapter 18	
PARTITIONING BY DISCRIMINANT ANALYSIS: A MEASURE OF CONSISTENCY IN THE NOMENCLATURE AND CLASSIFICATION OF VOLCANIC ROCKS by F. Chayes	521
Rationale	521
Procedure	522
Consistency of General Usage of Common Names of Cenozoic Volcanic Rocks	526
Author Index	533
Subject Index	544
Systems Index	586
